PROFILE

Full stack developer – I design and ship **mobile apps** (Flutter) and **web platforms** (Vue.js, ASP.NET MVC, Python) from architecture to production.

Four years working autonomously on enterprise business modules, mentoring juniors, hitting deadlines. Since October 2025 I've been reading for a **Master's in Artificial Intelligence** at DIT, preparing the next step: bringing data and machine learning into products that actually run.

PROFESSIONAL EXPERIENCE

4+ YEARS

APRIL 2023

PRESENT

CDI

Full Stack Developer EREVAN BÉNIN SA · Cotonou, Bénin

- Designed and shipped **internal platforms** – web (Vue.js + ASP.NET MVC) and mobile (Flutter) – from spec to production.
- Schema design and operations on **SQL Server & PostgreSQL**; **Docker** deployments.
- Junior referent: **mentored two interns** through to their defense, code reviews and handover.
- Owned business modules end-to-end: logistics tracking, reporting, fine-grained permissions.

MAY 2022

MARCH 2023

INTERN

Full Stack Developer BSM Groupe · Bénin

- Front-end and back-end of client web applications; WordPress sites and bespoke builds.
- **Figma** mockups, requirements analysis, team demos.

JANUARY 2021

APRIL 2022

FREELANCE

Developer – Independent missions Benin

- Web apps in **JavaEE** and **PHP / Laravel**: car rental, pharmacy management, contributions to the CKBA website.
- Mobile mockups in **Adobe XD** for clients launching new products.

EDUCATION

OCTOBER 2025

ONGOING

M1

Master's – Artificial Intelligence

Dakar Institute of Technology (DIT) · Dakar, Sénégal

- Deeper work on **machine learning**, data engineering and advanced software architectures.

OCTOBER 2019

MARCH 2023

Professional Bachelor's – Software Engineering

IFRI · Université d'Abomey-Calavi · Benin

- Foundations in software engineering, databases, web and mobile architectures.
